Asapio announces OEM agreement with SAP® to help businesses integrate SAP NetWeaver® systems with SAP Cloud Platform® Enterprise Messaging and SAP Fieldglass® solutions.

Walldorf / Munich, Germany — June 24, 2020 — Asapio today announces its new OEM agreement with SAP. Asapio's cloud integration technology enables SAP NetWeaver systems to natively communicate with SAP Cloud Platform Enterprise Messaging and SAP Fieldglass solutions.

> *"Asapio is excited to take our long-term partnership with SAP to a new level," said Peter Holtkamp, Managing Director at Asapio. "The ability to integrate cloud applications and services directly with SAP NetWeaver systems is highly beneficial for businesses, as it supports their cloud transformation."*

The '*Event Enablement Add-on 1.0*' allows real-time integration of SAP business data with Enterprise Messaging service on SAP Cloud Platform, enabling a multitude of new use cases such as IoT scenarios, SAP and third-party application integration, connecting to data lakes and cloud analytic solutions. For example, providing SAP sales and logistics information to a mobile app in real-time, integrating production data with cloud applications, and allowing big data integration between systems with multi-threading and micro-batching features.

The '*Event Enablement Add-on 1.0 for SAP Fieldglass solutions*' offers process integration with the SAP Fieldglass Contingent Workforce Management (https://www.fieldglass.com/solutions/contingent-workforce-management) and SAP Fieldglass Services Procurement (https://www.fieldglass.com/solutions/services-procurement) solutions, providing configurable integration content for:

- Master Data and Service Master synchronization
- Purchase Requisition and Purchase Order creation and revision (P2P or P2O scenarios)
- Standard, Service and Limit Purchase Orders and Maintenance Orders
- Service Entry Sheet posting and revisions and Finance/Logistics Invoicing
- Worker On/Off boarding

Routines can be configured for use with SAP Process Integration®. The Add-on leverages SAP Cloud Platform Enterprise Messaging to allow real-time connectivity and supports SAP Cloud Platform Integration® Suite (CPI) as middleware.

The software can be found on SAP Support Portal at https://launchpad.support.sap.com/#/softwarecenter

About Asapio

Asapio specializes in integration of cloud systems, SAP procurement solutions and technologies and was founded in 2003. Asapio is today an SAP silver partner with a strong team of SAP application and technology experts.
